

Refraction and diagnosis instruments
for opticians and ophthalmologists

Edgers and workshop
equipment for opticians

Edgers for opticians and industrial
solutions for laboratories

June 18, 2010

Dear Customers,

Luneau Technology, based in Chartres France, is pleased to announce the merger with Briot International which develops, manufactures and markets Briot & Weco edgers and Rodenstock Instruments refraction systems.

Through this merger, we are expanding on our products and leadership in innovation to enhance our partnership with you.

The Luneau-Visionix brand completes the Briot/Weco edger range with hi-tech optometric equipment and several patents in the ophthalmic optics sector. Our proven experience and reputation for innovation, combined with research and development, will create exciting and standard-setting products.

Synergies will be created to respond more effectively to your business needs in terms of products and services, with one constant objective: your satisfaction.
